EDUCATION

Manipal Institute of Technology — Bangalore, IN
Bachelor of Technology(Hons) in Computer Science (Minor in Data Science), 8.61 CGPA — *July 2023 – May 2027*

Narayana Junior College — Mumbai, IN
PCM with CS, 11th-12th, 85.8% — *August 2021 – May 2023*

WORK EXPERIENCE

Data Science Intern — August 2026 - Present
ArcherIRM

- Working as a part of the Archer Evolv product team and helping build new generation AI features through data experimentation and feature building.

Project Intern — April 2025 - August 2025
IEEE CS Bengaluru

- Developed an AI pipeline mapping multimodal video features to music recommendations; research accepted at an IEEE conference.

CERTIFICATIONS AND ACHIEVEMENTS

AI Developer Professional Certificate — *IBM*

AI, ML and Data Transformation on Google Cloud Platform — *Google Cloud*

Databases and SQL for Data Science with Python — *IBM*

3 time Hackathon Finalist — *TCS, Honeywell, EY*

2 Research Publications — *IEEE Conferences*

8 student leadership roles — *Various student clubs and committees*

PROJECTS

ElderSense – Multi-Agent AI System for Elderly Support — Link

- Developed a multi-agent backend system in Python to process real-time sensor events for fall detection, alerts, and reminders.
- Exposed REST APIs to a React front-end, handling concurrent events and simulating real-time device data streams.

Fake Review Detection System — Link

- Engineered a hybrid NLP pipeline combining TF-IDF vectorization and behavioral feature extraction, and trained ensemble classifiers (Random Forest, XGBoost) to detect fraudulent reviews with optimized F1-score.

Legal-Ease — Link

- Built a Chrome extension backed by a cloud-hosted API to process and summarize legal documents in real time.
- Deployed scalable backend services using Google Cloud Run and Vertex AI, focusing on low-latency request handling.

TECHNICAL SKILLS

Languages: Java, Python, C, SQL

Data Science & ML Libraries: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn

Developer Tools: Git, GCP, IBM Cloud, AWS, Excel, Jupyter Notebook, Power BI

Data Engineering: Data Pipelines, ETL/ELT, Data Modeling, Query Optimization

Analytics & Automation: Python Scripting, Data Analysis, Statistical Analysis, Forecasting
